

### **Programming/Student Success**

- Two viable schools offers some improvement in program compared to the current 3 school model
- Addresses the perception that students will get lost in the shuffle within one large school system
- French Immersion and IB programming located at Site #1 (Ferris) including all regular academic programming
- Extended French and TIL and all regular academic programming at Site #2 (Widdifield)
- SHSM and other specialized programs could potentially be rebranded to allow for them to be divided fairly between the 2 site locations.

### **Building**

- 2 (WSS and WFSS) current buildings would be refurbished to allow for accessibility for intended programing.
- West Ferris maintains an academic culture to address the community concerns
- Widdifield provides a location that elevates the traffic congestion concerns, and is the newer build of the 3 schools which should mean there are fewer infastructure issues (refurbishing costs demonstrated in the initial board report)

### **Considerations**

- The current facilities meet the academic and extra curricular requirements for delivery of programs (Gym, Theatre, Tech Based Classrooms, Labs etc)
