

**ARC Committee School Meeting**  
**Chippewa Secondary School**  
*March 2, 2017*

***Proposal - 3:1 Staff Brainstorming Related to Facilities***

**Facility**

- Common space/Student lounge
- School Store/Campus store
- WIFI to be enhanced
- Dance studio
- Music room
- Recording studio
- Drama studio/rehearsal classroom
- Technical Theatre Shop (Props, costumes, set design and construction, Costume, prop, lighting and sound storage)
- Stand alone, professional working theatre (Rental opportunities for community partnership). We will be giving up a tremendous amount of working theatres (CSS, WSS, WFSS). Must do a good job on this.
- Large group lecture theatre (Academic Theatre)
- Board Room/Meeting Room
- Outdoor field, covered turf field (community rental options)
- Greenhouse/Community gardens/community partnership opportunity-outdoor land/Greenspace
- Science Labs
- Access to Bike Path
- Outdoor education storage
- Student Council Office
- Student Council Storage space
- "On Route" style bathrooms (Wide, accessible entrance from hall) and a bank of single toilets (non-gender) in many spaces
- Student Services/Wellness Centre/Office- Living walls (OKP Style) - Home for Sexual Health Nurse, Nurse, Guidance, CDA, Mental Health supports,

LGBTQ support, Aboriginal programming and Aboriginal Gathering Circle space. Principals offices, main office and attendance can be placed in this area. Very cohesive.

- Building design to reflect our Northern Ontario lifestyle – use building materials that reflect this – like North Bay General Hospital and One Kids Place.
- Charging stations for technology – accessible to students and staff (Airport style)
- Therapeutic rooms for Special needs students (Sensory needs, occupational therapy room, Speech Therapy room, Physical Therapy room, Special Education Team meeting room)
- Safety- security (doors, buzz in, camera, staff identification swipe, alarms...)
- Be able to "lock down"/isolate different wings of the school (Emergency planning).
- Preserve current heritage, history and culture from the three schools and make them present at new build – Example (CSS Totem pole)
- Teacher resource centre in school (Photocopying, laminating, poster making, computer access and rentals- one giant works space)
- Coordinator's offices in housed inside the school. Direct access to Coordinators and facilitators. (Not effective to have them off property)
- Teacher work space/office- needed. Must be able to work with colleagues.
- Cafeteria - Student lead kitchen facilities/catering possibilities
- Staff dining room- staff need somewhere to eat and come together for community and culture of schools.
- Re-think "staff rooms". What is the need? Is there a need if we have proper work spaces, staffroom/dining facility, preparation room/resource room?
- Will teachers have their own classrooms or will classrooms be free of "ownership" and be accessible and available to all. Materials such as resources, teacher binders, belongings, personal momentos can be used in work areas/offices to avoid "ownership". Spaces can be allotted to departments but flexible with timetabling.
- Physical Education (court style gyms as well as other Personal Fitness spaces – Yoga/stretch studio, fitness centre, training gym/warm up gym)
- Air conditioning/ventilation/Air circulation and natural light.

- Year-round usage of schools – Summer school, community use, day camps..
- Staff parking lot
- Student parking lot
- Accessible parking
- Organized bus pick up/drop off zone
- Organized parent pick up/drop off zone
